

High Ability Students
September 19, 2018

Teachers I am sharing this information with you so we are on the same page with regard to our High Ability students. These are students who scored well in one or both areas of the COGAT test.

Last year, and the year before we had designated HA classrooms and teachers . The first year there was training for these teachers and last year there was not.

This year, after much research and collaboration with other building principals we chose to use the Cluster Model to provide services for our HA students. Our goal this year is to deliver instruction to all students as we differentiate instruction in the classroom.

Again, this handout outlines different models for delivery of HA instruction. Any of these models answers the requirement of the 2007 law that mandates students with HA be provided instruction that best meets their instructional needs.

Please let me know if you have any questions.

Mrs. Sanders
